## What's new at CTDHP?

### Intensive Community Outreach (ICO) for Pregnant Women

#### ICO works to increase women's dental care by:

- Joining the existing relationships of community-based organizations + prenatal clients + CTDHP.
- Linking pregnant women to oral health information and resources.

- Reaching out to pregnant women, Dental Health Care Specialists encourage them to see a dentist and establish a dental home.
- Connecticut is one of three states receiving a federal HRSA grant allowing for CTDHP to expand ICO across the State.

## It Is Safe To Have Dental Care During Pregnancy

- Prenatal women should maintain good oral health through their pregnancy
- Many women on HUSKY Health do not see a dentist while pregnant
- Poor Oral Health is Associated with Other Poor Health Outcomes

### Mothers should follow these keys to good oral health:

- ➔ Visit Your Dentist Regularly
- ➔ Establish a Dental Home
- ➔ Brush and Floss Twice a Day
- ➔ Eat Healthy - Avoid Sweets

**You're Not Healthy  
Without  
Good Oral Health!**
